

Ozark Veterinary Specialty Care

OVSC is a unique veterinary specialty care service that collaborates with your local veterinarian to provide advanced diagnostics, procedures and therapies that generally require significant expense and travel.

OVSC, in collaboration with your local veterinarian can help to increase care options for you and your pet to best accommodate resources and schedules.

- Collaboration effect, “One plus One equals Three”.
- Collaboration cultivates diversity, creativity, innovation and strengthens the relationships of the participants.
- Our loving relationships with our animals, is the reason we selflessly collaborate

Oncology/Chemo/Immunotherapy

Transfusion Support Services *Coming 2017

Internal Medicine Consultations

Pain Management Consultations

Soft Tissue Surgery

Not Just Procedures!

Oncology/chemotherapy/immunotherapy

Using a combination of conventional chemotherapy, integrative techniques along with the latest immunotherapy regimens, we have many new tools to help improve oncology therapy responses and outcomes longer term

Transfusion Support Services (coming 2017)

Does the appearance of a severely anemic patient in your schedule make you feel weak? OVSC, supported by the Arkansas Companion Animal Blood Bank, can bring to your hospital, appropriate transfusion products and diagnostics to help determine the origin of your patient's hematopathology, then develop and assist with a treatment plan when possible.

Internal medicine Consultations

Traditional internal medicine consultations regarding infectious, inflammatory, metabolic and endocrine disease are very welcome. Dr. Williams has a particular interest and experience with difficult immunopathology and endocrinopathy.

Pain management Consultations

There are few things more satisfying than helping an animal overcome chronic pain. Through multi-modal approaches, including medications, acupuncture and cold laser therapies. We can generally find a program that helps our loved ones live their lives out to the fullest

How Does OVSC Help?

Internal Coagulation and Dissection

OVSC has extensive training with the Ligasure internal coagulation and dissection devices. This device makes controlled surgery possible through 5 mm incisions...

Applications: Laparoscopic and Thoracoscopic dissections, assisted tumor excisions, retained testis removal, pericardial window's

Internal Diode Laser Surgery

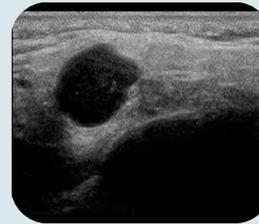

Utilizing commonly available "cold laser" systems, with surgical filaments and endoscopes, OVSC can perform highly technical internal dissection, ablation and anatomic corrective interventions right in your clinic

Applications: Nasal, respiratory and urogenital tumors, ectopic ureters, reduction of stenotic lesions and proliferative lesions

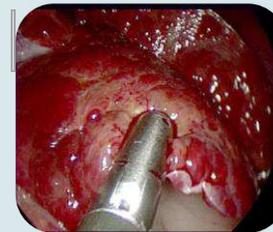

How Can OVSC Help?

Diagnostic & Therapeutic Ultrasound

Utilizing high definition ultrasonography equipment, OVSC can perform diagnostic abdominal, cardiac and other soft tissue studies. Using Ultrasound guidance, we can collect tissue samples as well as perform ablative injections for specific diseases.

Diagnostic Video Endoscopy

Utilizing high definition video endoscopic equipment, OVSC can perform advanced diagnostic procedures with minimally invasive technique to diagnose and develop treatment options for you and your pet

Interventional Endoscopy

Surgical and Oncologic Endoscopy. Utilizing state of the instruments, OVSC can often perform highly technical interventions to resolve anatomic defects and complications from trauma or malignancy. And of course GI and respiratory foreign bodies...

Why OVSC?

Jarod E. Williams DVM, DACVIM SAIM, CVA

Dr. Jarod Williams has extensive training & experience using interventional ultrasound & endoscopy and is a published author on the subject. Dr. Jarod can offer services unique to the Northwest Arkansas region, to benefit your clinic, patients and clients. Through the use of both state of the art and common equipment, we can find solutions to some difficult problems.

"I have worked with many veterinary specialists over the last 20 years. Dr. Jarod Williams is by far my favorite. He is professional, knowledgeable, accessible and compassionate. His compassion for patients is comforting and reassuring for pet owners. I will always choose Dr. Jarod first to care for my patients and clients. I know they are in wonderful hands with him." Dr. SJ DVM, Shreveport LA.

Connect & Collaborate

Dr. Jarod is available for consultations daily during the week. Feel free to call, email or fb message with any questions whether it is about a referral or not!!! Any internal medicine, oncology, critical care, pain management or integrative medicine topic is of interest!!!

479-256-4845

When Can OVSC Help?

Ectopic Ureters

Using a diode laser and rigid endoscope, we reduce ectopic channels back in to the bladder trigone

Nasal Tumors

Nasal tumors can be well visualized, debulked and laser ablated to restore airflow immediately

When can't OVSC help???

OVSC can offer a full service of endoscopy services and bring them to your clinic. Flexible GI, Urogenital, Respiratory and Major Cavitory. Just call and ask!!!
